SMART PHONE

A smart phone is a mobile phone with an advanced mobile operating system which combines features of a personal computer operating system with other features useful for mobile or handheld use. They typically combine the features of a cell phone with those of other popular mobile devices, such as personal digital assistant (PDA), media player and GPS navigation unit. Most smart phones can access the Internet, have a touch screen user interface, can run third-party apps, music players and are camera phones. Most smart phones produced from 2012 onwards also have high-speed mobile broadband 4G LTE internet, motion sensors, and mobile payment mechanisms.

In 2014, sales of smart phones worldwide topped 1.2 billion, which was up 28% from 2013.

Display

One of the main characteristics of smart phones is their screen. It usually fills almost the entire phone surface (about 70%); screen size usually defines the size of a smart phone. Many have an aspect ratio of 4 : 3 or 16 : 9.
